

Database Project Update 1 Report & Presentation

Submission Guidelines

1. One member from each group will submit the report online.
2. Multiple submissions will result in mark deductions.

Presentation Requirements

1. Each group must present their project update based on their report.
2. Both members must be present on 28 July to receive marks.

Report Structure

1. Cover Page

Must include: Project Name, Project ID, Group ID, Group Members' Names and IDs, Course Code, and Section.

2. Final Project Scope Description

Provide an updated version of your Project Scope. Clearly describe the objectives and functionalities of your project.

Project Objectives: Summarize your project's key objectives.

Project Functionalities: Describe functionalities such as student registration, result processing, etc. Ensure your selected functionalities incorporate all ERD concepts, including:

- a. Entities: Strong and weak entities
- b. Relationships: One-to-One, One-to-Many/Many-to-One, Many-to-Many
- c. Generalization/Specialization
- d. Role
- e. Ternary Relationship
- f. Composite, Multivalued, and Derived Attributes

3. Entity-Relationship Diagram (ERD)

Attach a clear version of your ERD prepared using software drawing tools in your report.

4. Relation Schema

Define the relational schema for your database, ensuring all ERD concepts are correctly translated.

5. Group Members' Contribution Statements

Clearly describe each member's contribution to the project.

6. Conclusion

Summarize key findings, challenges, and how your project meets database design principles.
